

Catherine Eckel is Sarah and John Lindsey Professor in the Liberal Arts at Texas A&M University, and directs the Behavioral Economics and Policy Program. She has held faculty positions at the University of British Columbia, Virginia Tech, and the University of Texas at Dallas, where she was founder and director of the Center for Behavioral and Experimental Economic Science. As an experimental economist, she has participated in interdisciplinary research teams focusing on such topics as charitable giving; cooperation, trust, and risk tolerance in poor, urban settings; diet, exercise and obesity in low-income populations; enhancing preparation for natural disasters among lower-income neighborhoods; and the organization of care provision. Her research is funded by private foundations and the National Science Foundation, where she has been principal investigator or co-principal investigator on more than 20 grants. She is a member of an NSF-funded coordinating network on the development of social observatories (socialobservatories.org), and served for two years as an NSF program director for the economics program. She was co-editor of the *Journal of Economic Behavior and Organization* (2005-2012). In 2012, she received the Carolyn Shaw Bell Award from the Committee on the Status of Women of the American Economic Association for her work advancing women in economics.
